## GERMANS ATTACK ALONG NEW FRONT

Onslaught Made on Front of 20  
Miles Gains 2.5 Miles at  
Certain Points.

Paris.—In a new thrust directed at the sector between Montdidier and Noyon, the Germans have succeeded in gaining ground along about a 20-mile front to a depth of about two and a half miles at certain points, according to the war office announcement.

On the French left wing furious German attacks made time after time were broken by the French fire.

In the center the enemy, bringing up reinforcements, made progress, reaching the southern part of Cuvilly wood and Reconnais-sur-Matz.

On the French right wing along the front of the new attack bitter fighting continues. The French took more than 500 prisoners in various engagements. Prisoners report unanimously that the losses of the Germans thus far in the battle have been extremely heavy.

Notwithstanding the great forces the Germans threw into the line when they opened their offensive between Montdidier and the Oise, they did not achieve any considerable advance.

The enemy apparently hoped by weight of numbers to break the line on this sector, which he failed to do during the first half of April, when so many severe engagements resulted in the Germans being stopped short.

Time after time increasingly dense waves of infantry attempted to pierce the allied defenses. Southwest of Noyon, however, they could not produce any effect on the determined troops holding the front lines. The defenders were as firm as rocks and held the enemy tightly in check.

The Germans were able to make some immediate progress because the allies retired from the advanced posts which constitute the first line westward from Noyon. When the real line of resistance was reached, however, the enemy's advance was checked and small counter attacks delivered immediately by the allies were successful in regaining ground.

## YANKEES REPULSE GERMAN ATTACKS

With the American Army in France. Attacks by the Germans in the Marne sector have again been repulsed by the Americans, who inflicted heavy losses on the enemy.

The French report two attacks against Hill 204, west of Chateau Thierry.

The French troops captured a wood south of Buziars.

A new German division, the Fifth Grenadier guards, was identified by the Americans for the first time.

The Americans who swept the Germans back two miles on a five mile front northwest of Chateau-Thierry held their gains in the face of determined German counter attacks.

With the aid of French infantry, the American marines and machine gunners were consolidating their positions all along the new front.

The Americans now hold all the high ground in the battle area north-west of Chateau-Thierry.

The Americans fought with more than their old time gallantry, going over the top whistling "Yankee Doodle."

## U. S. CASUALTIES ARE 7315

General Pershing Reports 1033 Soldiers Killed in Action.

Washington.—Casualties among the American expeditionary forces thus far reported by General Pershing total 7315, the war department announced in making public the first of regular weekly summaries of casualties. Deaths in action and from wounds, disease, accidents and all other causes number 2927, while 4046 men have been wounded and 342 are missing in action, including men held prisoners in Germany.

The department's recapitulation follows:

Killed in action (including 291 at sea), 1033; died of wounds, 310; died of disease, 1192; died of accidents and other causes, 392; wounded in action, 4046; missing in action (including prisoners), 342.  
Total 7315.

## Decorate Yankee Who Swam Marne.

Washington.—General Pershing's communique states that Lieutenant William J. Flannery, infantry, received the Croix de Guerre for swimming the Marne on June 2 and bringing back a wounded French soldier.

## General Michie Is Dead.

Paris.—General Robert E. L. Michie, of the American army, died in a railroad train near Rouen. His death was sudden and unexpected, as he had not been ill.

## Ford

THE UNIVERSAL CAR

## What Are The Six-Year Molars?

WHEN the child is about six years of age the first permanent molars appear. There are four of them—two in the upper jaw and two in the lower. They come in after all the temporary teeth have taken their place, and appear just back of the last temporary molar on each side and in each jaw. They are very often mistaken for temporary teeth, and folks imagine that any teeth coming in at that age must necessarily be temporary teeth. If anything goes wrong with them they let it go, thinking they will soon be replaced by Nature.

If any of the six-year molars are allowed to be lost by decay, it is a loss which cannot be replaced. Nothing can ever be done in the future which will permanently replace the lost molar after it has been removed.

These four permanent molars do most of the masticating for a period of five years. They prop the jaws apart while other teeth mature and take their several places in the jaw. Their loss is not necessary and may be wholly avoided. No other teeth are so necessary and important as the first permanent or six-year molars.
